

DRAW A LITTLE. MAKE IT YOURS.

A cottage with a little path

Moderate | A roof, side wall and simple depth

Dark lines are new. Gray lines were drawn in an earlier stage.

STEP 7

STEP 8

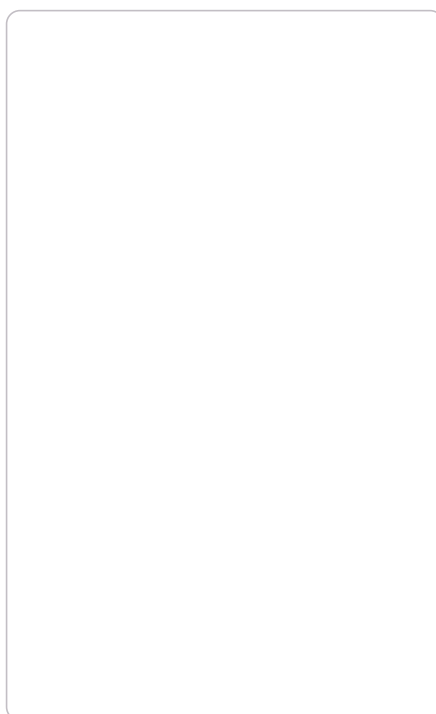

1. Draw a triangle for the front roof, keeping its bottom level.
2. Add the front wall beneath the roof with two upright sides and a base.
3. Extend the roof to the right and add a narrow side wall.
4. Draw a door with a rounded top and a small handle.
5. Add a front window with a frame and a cross inside.
6. Draw a chimney and a smaller window on the side wall.
7. Draw a path that widens toward the bottom. Add two short ground lines.
8. Add a small bush, a few roof marks and a puff of smoke.

Try this fix: If the side wall looks too wide, bring its far edge closer. Keep the front wall as the main face of the house.
