DRAW A LITTLE. MAKE IT YOURS.

A small watering can

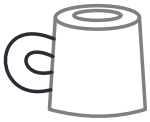
Easy | A vessel, angled spout and open handle

Dark lines are new. Gray lines were drawn in an earlier stage.

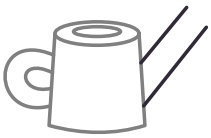
STEP 1

STEP 2

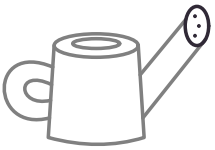
STEP 3



STEP 4



STEP 5



STEP 6

1. Draw the can body with a flat bottom and gently sloping sides.
2. Add a narrow oval at the top and a small oval opening inside it.
3. Draw a wide curved handle outside the left side.
4. Add an angled spout on the right, wider at its base.
5. Put a small oval rose at the spout end with three holes.
6. Decorate the can with a stem and two leaves.

Try this fix: If the handle looks solid, widen its inner opening. Keep the spout clear of the top rim.
